

Attention Homeowners
STREET PAVING
Will begin in your neighborhood on
August 29, 2010-September 2, 2010

Dear Resident:

The Middlesex Corp. has a contract to pave your street and other streets in this area. Please be aware of the following:

YOUR SAFETY

During paving operations, traffic will be routed around the work area. Please pay attention to flagmen, signs, and barricades – drive slowly – and stay alert.

Paving equipment may be parked overnight in your neighborhood. Please do not allow children to play on or around this equipment.

Sometimes a portion of existing asphalt will be removed before new asphalt is installed. This may leave gutters and manholes temporarily higher than the adjacent surface – be aware of these “bumps” when walking or driving.

Sometimes a hot black sticky substance will be sprayed on the road prior to paving. Do not walk or drive through this material. It is very hard to clean and will “track” everywhere you go. Check your shoes before entering your house or car if you think you have stepped in this sticky liquid.

YOUR COOPERATION

Do not park cars on the street during the date(s) of work. The police will remove them if the owner cannot be located.

Once paving operations take place in front of your house, you will not be able to move cars from or into your driveway until the paving crew says OK. This could be for an hour or two.

When driving on newly installed asphalt, please turn your wheels gently and avoid quick starts or stops. The surface of the asphalt takes several days to attain its full hardness.

SPRINKLER SYSTEMS

Do not run sprinkler systems during the day until the asphalt paving is completed in front of your house.
