Orlando, FL 32801

**RE: Town of Windermere – Butler Street Roadway Improvements
Section 08, Township 23 South, Range 28 East, Orange County, Florida**

Dear Mr. Chau,

We are pleased to submit our proposal for Subsurface Utility Verification on the above referenced project.

SCOPE OF WORK:

1. Coordinate Sunshine 811 and utility locates to include supplemental calls to each locator to expedite the field marking of each subsurface utility as required by law.
2. Expose the subject utilities by using non-destructive vacuum excavation methods at **seven (7)** specific locations as indicated on plan sheet(s) provided or marked by client in the field
3. Confirm/determine the vertical and horizontal position of the subject utilities and record the information, using the locate marks provided by the utility owners and/or their representatives unless otherwise specifically requested by client.
4. Any asphalt/concrete removed will be repaired using like materials.
5. Tie each test hole location to a minimum of three visible physical features to enable this data to be added to your base map and also enable future recovery.

The final product will be test hole reports/sketches of the project area reflecting all pertinent data for your use.

Terms and Conditions

It is understood that the construction contractor is responsible to abide by Sunshine 811, Florida State Statutes Chapter 556.106 and all applicable laws, and regulations that pertain to the services provided.

Kimley-Horn will make available all plans and utility records that have been obtained for this site. However, the information provided by Kimley-Horn is also dependent upon a Sunshine 811 request for utility owners and/or their representatives to mark their buried underground plant at the project site as required by law. Southeastern Surveying and Mapping Corporation (SSMC) has a right to rely on the accuracy of such plans and utility records and will notify Kimley-Horn if there are any patently or reasonably identifiable defects in the documents.

Kimley-Horn is aware that due to the inherent uncertain nature of subsurface utilities, including but not limited to deficient or misrepresentation of prints, SSMC cannot guarantee that all subsurface utility lines will be accounted for. SSMC will ensure that all reasonable efforts are made to identify the location of said underground utilities and provide the best available information within the project area with the use of Ground Penetrating Radar, Electronic Line Locating Equipment and Vacuum Excavation methods, as needed. Additional research will only be conducted by SSMC if requested in writing by Kimley-Horn.

In accordance with the Underground Facility Damage Prevention and Safety Act, the Design Engineer shall perform sufficient Utility Coordination with the Utility providers in this location to affirm the information from SSMC's efforts and confirm that no other subsurface utility is possibly undetected by these efforts.

SSMC shall not be held liable for any latent or unreasonably discoverable utilities in the project area. Furthermore in the event of a claim regarding the services provided in the proposal, SSMC shall have liability for reasonable and necessary defense costs to the extent caused by SSMC's negligence.

M.O.T. will be used only if absolutely necessary and these invoice charges will be an addition to the total per day rate and reflected on our invoice to you.

Note: If permitting is required for said work, these charges will also be additional and reflected on our invoice to you.

Note: Test Holes that require a depth of greater than ten (10) feet, or require a substantial amount of increased effort (sleeving, shoring, de-watering, etc.), then said Test Holes may need to be negotiated separately on a case by case basis if normal vacuum excavation practices do not allow said utilities to be exposed.

Note: All utility sizes given are outside diameter unless otherwise specified and are approximate only due to uncontrollable field conditions that may be encountered during excavation.

Note: Any additional overlaying or restoration of pavement, other than the replacement of materials removed and cold patched, will be the responsibility of Kimley-Horn.

Our fee for this project will be as follows:

Test Holes/Day Rate:

\$421.00 Dirt/Each (anticipate 7)	\$2,947.00
\$480.00 Asphalt/Concrete/Each (anticipate 0)	

M.O.T.: (SSMC) (Roadway Digs Only)

\$731.00 per Lane Closure/Day Rate
\$931.00 per Lane Closure/Night Rate

Permitting: (If Required)

\$103.00 per hour + cost of permit

The fee estimate for the proposed scope of services is valid for six (6) months from the date of proposal.

We anticipate completion of the above described work within **three (3)** weeks after receipt of approved permit and written notice to proceed.

Payment is expected within thirty (30) days from date of invoice.

Notice to Owner:

- For all construction related projects a Notice to Owner will be filed.

We look forward to the opportunity to work with you on this project.

Sincerely,

M. Scott Sowards
Utility Project Manager
