**Mix together in a bowl:**

-2 3/4 cups of flour

-1 3/4 cups of extra fine sugar (or regular sugar will work as well)

-2 teaspoons of baking powder

-1/2 teaspoon of salt.

Mix together all the ingredients thoroughly and sift them as well. This makes about 4 1/2 cups or one full cake mix. You can make this recipe a bunch of times and store each individual cake mix in a big mason jar *or* you can make a big batch by tripling or quadrupling the recipe and store it all together in a big glass jar on your kitchen counter. When you're ready to make a cake, just measure out 4 1/2 cups of the cake mix and you're ready to go!

To make this cake mix into a **basic yellow cake** just add:

-1/2 cup of melted butter

-1 1/4 cups of milk

-3 eggs

-2 1/2 teaspoons of vanilla extract

Bake your cake at 350 degrees. If you're making cupcakes, it should be around 15-20 minutes. If you're using round or square cake pans, about 30-40 minutes.
